

February 2020 Monthly Catalogue

Welcome to the February 2020 edition of the NHBS Monthly Catalogue, which lists all new titles added to our website in the last month.

We again lead with an exceptionally strong and diverse selection of ornithology titles. Probably the most important title to announce here is [The Biology of Molt in Birds](#), due July from Helm. Authored by the same team who wrote *Molt and Ageing in European Passerines*, this is a companion volume that will go deeper into bird biology. The other unusual bird book this month is [Investigating Egg Failures in Birds](#), published by Biosphere Science Productions in the Netherlands. Aimed at the practising ornithologist and field worker, this book offers hands-on information on examining broken, abandoned and failed bird eggs encountered in the field. Field guide-wise, we have just received stock of [An Illustrated Field Guide to the Birds of Colombia](#), published by the Wildlife Conservation Society, which is the second guide currently available to this country (a third one by Lynx is in the making). Another noteworthy field guide is the [Multimedia Identification Guide to North Atlantic Seabirds: Shearwaters: Jouanin's & White-Chinned Petrels](#), due April from Scilly Pelagics, which is the final volume in this series. On the front of monographs, Bloomsbury will publish [Birds of the UK Overseas Territories](#) under their Poyser imprint in July and Snowfinch Publishing will publish the second edition of [The Merlin](#) in February. For artists and illustrators there is the revised edition of [Bird Anatomy for Artists: Comprehensive Guide to Drawing Birds for Artists and Bird Lovers](#), published by BFineArt in Australia, which is an exceptionally beautiful book. Finally, on the subject of good reads, there is the fund-raising book [Red Sixty Seven: A Collection of Words and Art Inspired by Britain's Most Vulnerable Birds](#), due February from the BTO, and [Swifts and Us: The Life of the Bird that Sleeps in the Sky](#), due April from Harper Collins.

For the other vertebrate groups the pickings are a bit slimmer this month, but no less interesting. The University of Chicago Press will publish [Phyllostomid Bats: A Unique Mammalian Radiation](#) in June, which is a unique bat family due to its dietary diversity, encompassing blood, fruit, pollen, and nectar. CRC Press will publish [The Complex Lives of British Freshwater Fishes](#) in May and we are stocking the second edition of the bilingual book [Historical Portrait of the Progress of Ichthyology, From its Origins To Our Own Time](#), published by the Paris Muséum National d'Histoire Naturelle.

On the topic of insects and other invertebrates, I will start with the "other" first: spiders. The second big book from The University of Chicago Press to announce is the massive 700-page tome [Spider Webs: Behavior, Function, and Evolution](#), due May. The British Arachnological Society, meanwhile, has just published the third edition of their [Arachnologists' Handbook](#). Insect-wise there is the fourth incarnation of Otakar Kudrna's butterfly atlas, this time under the title [Distribution Atlas of European Butterflies and Skippers](#), which is available now. NatureBureau will publish [The Bumblebee Book](#) in May, and Brambleby Books has announced [Dragons & Damsels: An Identification Guide to the British and Irish Odonata](#) for March.

Botanists can look forward to [Britain's Orchids: A Field Guide to the Orchids of Great Britain and Ireland](#), due July from WILDGuides, and the 3-volume set [A Flora of the Eastern Cape Province](#) from SANBI, of which we are awaiting stock. For mycologists, there is [Mushrooms and Toadstools of Britain & Europe, Volume 2](#), authored by Geoffrey Kibby, which is due February. The scope of this series has now been expanded from two to a total of three volumes.

On the topic of conservation, readers can look forward to Stephen Moss's [The Accidental Countryside: Hidden Havens for Britain's Wildlife](#), due March from Faber & Faber, [A Journey in Landscape Restoration: Carrifran Wildwood and Beyond](#), due May from Whittles Publishing, and the paperback of [The Missing Lynx: The Past and Future of Britain's Lost Mammals](#), due July from Bloomsbury. Environmental issues are dealt with in [Liberty and the Ecological Crisis: Freedom on a Finite Planet](#), which has just been published by Earthscan, the paperback of [Losing Earth: The Decade We Could Have Stopped Climate Change](#), due April from Picador, and [Sophie's Planet: A Search for Truth About Our Remarkable Home Planet and Its Future](#), due July from Bloomsbury, authored by none other than climate scientist James E. Hansen. Two books taking a historical perspective are [The Contamination of the Earth: A History of Pollutions in the Industrial Age](#), due July from MIT Press, and [The Chemical Age: How Chemists Fought Famine and Disease, Killed Millions, and Changed Our Relationship with the Earth](#), due April from the University of Chicago Press.

On the topics of ecology, evolutionary biology and palaeontology we have one noteworthy title each. The paperback of [Eco-Evolutionary Dynamics](#) is due July from Princeton University Press. Harper Collins will publish [Metazoa: The Evolution of Animals, Minds, Consciousness and Sleep](#) in May, which is written by Peter Godfrey-Smith who previously authored *Other Minds*. Lastly, NatureBureau is publishing [Jurassic Skye: Dinosaurs & Other Fossils of the Isle of Skye](#) in February.

Good reads this month come in the shape of the paperback of [A Claxton Diary: Further Field Notes from a Small Planet](#), due July from Vintage, [Natural Awakenings: Early Naturalists in Lakeland](#), published by the Cumberland & Westmorland Antiquarian and Archaeological Society and in stock now, and the biography [A Dominant Character: The Radical Science and Restless Politics of J. B. S. Haldane](#), due July from W.W. Norton & Co.

As always, if you are looking for a particular title that we do not yet have in our range, or you would like to suggest a title for NHBS to stock, please do get in touch.

Liberty and the Ecological Crisis

Freedom on a Finite Planet

Christopher J Orr(Editor), Kaitlin Kish(Editor), Bruce Jennings(Editor)

Liberty and the Ecological Crisis examines the concept of liberty in relation to civilization's ability to live within ecological limits. Freedom, in all its renditions – choice, thought, action – has become inextricably linked to our...

Before the Collapse

A Guide to the Other Side of Growth

Ugo Bardi(Author)

Nobody has to tell you that when things go bad, they go bad quickly and seemingly in bunches. Complicated structures like buildings or bridges are slow and laborious to build but, with a design flaw or enough explosive energy, take only seconds to...

242 pages | 22 colour photos and colour illustrations, 33 b/w illustrations | Springer Nature

Hope in Hell

A Decade to Confront the Climate Emergency

Jonathon Porritt(Author)

Climate change is the defining issue of our time – we know, beyond reasonable doubt, what that science now tells us. Just as climate change is accelerating, so too must we – summoning up a greater sense of urgency, courage and shared...
