

April 2019 Monthly Catalogue

Welcome to the April 2019 edition of the NHBS Monthly Catalogue, which lists all new titles added to our website in the last month.

We have some fantastic titles on mammals to announce this month, and all of the following books are due September. First off, Lynx will publish the last volume in their magnificent Handbook of the Mammals of the World series. [Volume 9 treats all the world's bats](#). With it, we will of course offer the [full 9-volume set](#) for sale. More practical and aimed at bat workers is Pelagic Publishing's [Is That a Bat?: A Guide to Non-Bat Sounds Encountered During Bat Surveys](#). Academic Press meanwhile keeps steadily adding volumes to their Biodiversity of the World series, the latest title being [Pangolins: Science, Society and Conservation](#). They will also publish [European Whales, Dolphins, and Porpoises: Marine Mammal Conservation in Practice](#). Bloomsbury will publish the paperback of [When the Last Lion Roars: The Rise and Fall of the King of the Beasts](#). That rounds up the September titles. Ben Garrod is currently writing [The Chimpanzee & Me](#), due July from Head of Zeus, and MIT Press will publish [Why Chimpanzees Can't Learn Language and Only Humans Can](#) in October.

We might just as well have started this month with birds, as there are a number of very strong titles here too. Birders have waited for years for a guide to Mongolia, and, just like that, we will have two this year. Next to the Helm Field Guide, John Beaufoy will publish [A Field Guide to the Birds of Mongolia](#) in October. Princeton University Press will publish [Birds in Winter: Surviving the Most Challenging Season](#) in August, which is the first book on this topic as far as we are aware of. Bloomsbury will reissue two titles with the fourth edition of [Where to Watch Birds in Southern & Western Spain: Andalucia, Extremadura and Gibraltar](#) and the paperback of [The Wonderful Mr Willughby: The First True Ornithologist](#) both due in August. Lastly, two smaller guide are [British Birds: A Pocket Guide](#), due August from WILDGuides, and the laminated fold-out guide [Ecuador: Birds / Aves](#) from Rainforest Publications, which is in stock now.

Entomologists, equally, will not find themselves short-changed this month. The next New Naturalist (after Gulls and Garden Birds) will be [The Honey Bee](#), written by Norman Carreck and due September from Harper Collins. More bees come from Princeton University Press with [The Solitary Bees: Biology, Evolution, Conservation](#), due September. Anyone who studies insects hands-on will be delighted to hear that Academic Press will publish the second edition of [Insect Collection and Identification: Techniques for the Field and Laboratory](#) in October (in its first edition, this book was titled Arthropod Collection and Identification: Laboratory and Field Techniques). A number of smaller field guides come from John Beaufoy with [A Naturalist's Guide to the Insects of Australia](#) due in August and the second edition of [A Naturalist's Guide to the Butterflies of Great Britain & Northern Europe](#) due this month. Lastly, we have received stock of [The Butterflies and Day-Flying Moths of Lancashire & North Merseyside](#), published by the Lancashire & Cheshire Fauna Society.

On the topics of reptiles & amphibians and fish we have a small number of titles each. Oxford University Press will publish [Islands and Snakes: Isolation and Adaptive Evolution](#) in September and we have two hard-to-find field guides that were published recently: [Snakes of Malawi](#) from Njoka Books, and [A Field Guide to the Amphibians & Reptiles of Trinidad & Tobago](#) from the Trinidad & Tobago Field Naturalists' Club. A similar hard-to-obtain title is the bilingual fish guide [Coastal Marine Fishes of São Tomé and Príncipe](#) from Flying Sharks. Mark Kurlansky, meanwhile, is writing [Salmon and the Earth: The History of a Common Fate](#), due September from Patagonia Books.

For botanists we have a range of field guides this month. Royal Botanic Gardens, Kew is working on [Field Guide to the Plants of the Falkland Islands](#), due July. Two guides that are sequels of-a-sort are [Flora of the Mediterranean: An Illustrated Guide](#), due August from Bloomsbury, which follows in the footsteps of the popular Flora of the Silk Road, and the privately published [A Pocket Guide to Anglesey Coastal Flowering Plants](#), which follows on Anglesey Flowering Plants and their Habitats. Not field guides, but no less interesting are [British Forests: The History of the Forestry Commission 1919-2019](#), due August from Profile Books, and [Vickery's Folk Flora: An A-Z of the Folklore and Uses of British and Irish Plants](#) from Weidenfeld & Nicolson, available now. For mycologists Naturebureau will publish two fungi guides in September: [A Guide to Finding Woodland Fungi in Berks, Bucks & Oxon](#) and [A Guide to Finding Grassland Fungi in Berks, Bucks & Oxon](#).

For conservation biologists and ecologists we have some exceptional titles lined up. Johns Hopkins University Press is publishing a number of new titles in their Wildlife Management and Conservation series with the edited collections [International Wildlife Management: Conservation Challenges in a Changing World](#) and [Renewable Energy and Wildlife Conservation](#) both due in September. Island Press is publishing the second edition of [Corridor Ecology: Linking Landscapes for Biodiversity Conservation and Climate Adaptation](#) in June. New titles are [Open Ecosystems: Ecology and Evolution Beyond the Forest Edge](#), due August from Oxford University Press, and [Population Ecology in Practice: Underused, Misused and Abused Methods](#), due September from Wiley-Blackwell. On the topic of environmental issues, Penguin Books will publish the paperback of [How to Give Up Plastic: A Guide to Changing the World, One Plastic Bottle at a Time](#) in April, while Naomi Klein is writing [On Fire: The \(Burning\) Case for a Green New Deal](#), due September from Allen Lane.

To round out this month's selection with more general natural history, there are three paperback reprints, all due September: Peter Wohlleben's [The Secret Network of Nature: The Delicate Balance of All Living Things](#) from Vintage, [The Ravenmaster: My Life with the Ravens at the Tower of London](#) from Fourth Estate, and Simon Barnes's [Rewild Yourself: 23 Spellbinding Ways to Make Nature More Visible](#) from Simon & Schuster. And if you do find yourself looking out of your window, there is always the second edition of [Guide to Garden Wildlife](#), due September from Bloomsbury.

As always, if you are looking for a particular title that we do not yet have in our range, or you would like to suggest a title for NHBS to stock, please do get in touch.

The Extraordinary Story of the Apple

Barrie E Juniper(Author), David J Mabberley(Author)

The story of apples begins in an unexpected place: with bears. While popular culture likes to link honey with these creatures, DNA evidence shows that it might be more accurate for Winnie the Pooh to be munching on an ancestor of Red Delicious. And...

Fossils of the Milwaukee Formation

A Diverse Middle Devonian Biota from Wisconsin, USA

Kenneth C Gass(Author), Joanne Kluessendorf(Author), Donald G Mikulic(Author), Carlton E Brett(Author)

Easily overlooked due to its extremely limited exposure and geographic extent, the Milwaukee Formation seldom comes up in discussions of Devonian paleontology or geology. In spite of this, it contains one of the most rich and diverse Devonian biotas...
