

April 2021 Monthly Catalogue

Welcome to the May 2021 edition of the NHBS Monthly Catalogue, which lists all new titles added to our website in the last month.

We have a diverse range of bird books this month. The Luxembourgish publisher natur&emwelt has published an English translation of [Birds of Luxembourg](#) that is now in stock. From John Beaufoy we have second editions of [A Naturalist's Guide to the Birds of Hong Kong](#) and [The 100 Best Birdwatching Sites in Australia](#), both due August. Another site guide is the 2021 reprint of [A Birdwatching Guide to the Netherlands](#) from author Roger White that features minor corrections and some new maps. The phenomenal [Owls of the Eastern Ice: The Quest to Find and Save the World's Largest Owl](#) will be released in paperback in October by Penguin Books. Another book dealing with birds in Russia is [A Wild Bird and a Cultured Man: The Common Eider and Homo sapiens: Fourteen Centuries Together](#), written and published by Alexandra Goryashko, which is in stock now. On the subject of bird behaviour, CSIRO will publish [Bird Talk: An Exploration of Avian Communication](#) in May.

For other vertebrate groups, there are a few books worth mentioning. Wild Nature Press will publish the second edition of [A Pocket Guide to Sharks of the World](#) in July, while the paperback of [Salmon: A Fish, the Earth, and the History of a Common Fate](#) is due in October from Oneworld Publications. Chimaira will publish [Status and Threats of Afrotropical Amphibians: Status of Conservation and Decline of Amphibians: Eastern Hemisphere: Sub-Saharan Africa, Madagascar, Western Indian Ocean Islands](#), which is volume 11, part 7 in the series [Amphibian Biology](#). John Beaufoy, then, has announced [Wildlife of the Australian Rainforests: A State-By-State Guide](#) for August.

There are some fantastic insect field guides in the works. Comstock will publish [Pocket Guide to the Insects of Costa Rica](#) in October and [Dragonflies and Damselflies of Costa Rica: A Field Guide](#) in May. Bloomsbury is inaugurating a new series of spiralbound guides, starting in September with [British Moths: A Gateway Guide](#). Natural History Publications Borneo has just published [A Taxonomic Guide to the Stick Insects of Sumatra, Volume 2](#), which is the sixth in their series of [Taxonomic Guides to the Stick Insects of South East Asia](#). Practising entomologists and insect collectors of any stripe will welcome [Specimen-Making and Preservation of Invertebrates](#) that has just been published by Chimaira. And if you are looking for an exciting read, the paperback of [The Language of Butterflies: How Thieves, Hoarders, Scientists, and Other Obsessives Unlocked the Secrets of the World's Favorite Insect](#) is due July from Simon & Schuster.

Botanists will be very pleased with the just-published [Grasses: A Guide to Identification Using Vegetative Characters](#), a new [AIDGAP](#) guide from the Field Studies Council. By using vegetative characters rather than flower heads as diagnostic criteria, this guide allows fieldwork during a larger part of the year. Kew Publishing will release the second edition of their [Field Guide to the Wild Flowers of the Western Mediterranean](#) in September, and Pelagic Publishing has announced [Brown Seaweeds \(Phaeophyceae\) of Britain and Ireland](#) for October, which is the culmination of 30 years of studies by the author. Mycologists can look out for the paperback of Merlin Sheldrake's [Entangled Life: How Fungi Make Our Worlds, Change Our Minds and Shape Our Futures](#) in September from Vintage. Of local interest is [A Provisional Census Catalogue of the Myxomycetes of the Forest of Dean](#), which has just been published by the Gloucestershire Naturalists' Society.

There are many outstanding titles on the topic of conservation and environmental issues this month. Dave Goulson is writing [Silent Earth: Averting the Insect Apocalypse](#), due August from Jonathan Cape. September will see [Conservation Technology](#) from Oxford University Press and [Ancient Woods, Trees and Forests: Ecology, History and Management](#) from Pelagic Publishing, while Siri Scientific Press is publishing [Why Conservation Isn't Working: Understanding Wildlife in the Modern World](#) in July. The important topic of collective responsibility is receiving increasing attention, with the University of Chicago Press publishing [We Are All Whalers: The Plight of Whales and Our Responsibility](#) in October and Saraband releasing [Extraction to Extinction: Rethinking our Relationship with Earth's Natural Resources](#) in September. Springer, meanwhile, has just published the paperback of [Planetary Accounting: Quantifying How to Live Within Planetary Limits at Different Scales of Human Activity](#). Lastly, Atlantic Books has announced [Hot Air: The Inside Story of the Battle Against Climate Change Denial](#) for October, written by MET Science Fellow Peter Stott.

Finally, a selection of titles across a range of subjects. For readers interested in environmental history there are Amitav Ghosh's [The Nutmeg's Curse: Parables for a Planet in Crisis](#), due October from Hodder & Stoughton, and the paperback of [Myxomatosis: A History of Pest Control and the Rabbit](#), published by Bloomsbury Academic. Ecologists can look forward to a new [New Naturalist](#) with [Ecology and Natural History](#), due June from HarperCollins, and [Oak Seed Dispersal: A Study in Plant-Animal Interactions](#), which has just been published by Johns Hopkins University Press. Readers interested in evolution will enjoy the paperback of [The Evolution of Feathers: From Their Origin to the Present](#), published by Springer. For those interested in palaeontology, the University of Chicago Press has a treat in store for September that combines palaeobotany and art: [Tropical Arctic: Lost Plants, Future Climates, and the Discovery of Ancient Greenland](#). Last, but certainly not least, HarperCollins is releasing a fully updated edition of Sir David Attenborough's [The Living Planet: A Portrait of the Earth](#) in October.

As always, if you are looking for a particular title that we do not yet have in our range, or you would like to suggest a title for NHBS to stock, please do get in touch. In the meantime, stay safe and keep well.
