

April 2022 Monthly Catalogue

Welcome to the April 2022 edition of the NHBS Monthly Catalogue, which lists all new titles added to our website in the last month.

There are a number of fine bird titles in the works. In September, Bloomsbury will publish [The Tawny Owl](#), part of their long-running Poyser Monographs series, and [Birds of South Africa](#), part of their new Helm Wildlife Guides series. Another identification guide is [Gulls of North America](#), due April from Schiffer. The History Press is publishing the paperback of [How to Read a Bird](#) in June, while [Bird Photographer of the Year, Collection 7](#) is due in September from HarperCollins.

There are two noteworthy mammal titles this month. Pelagic Publishing will release the second edition of [Social Calls of the Bats of Britain and Ireland](#) in June while [A Guide to the Deer of the World](#) is due in July from Quiller Publishing.

For entomologists, this month's selection spans the globe. NatureBureau will publish [Butterflies of Kent & South East London](#) in May while we just received stock of [Butterflies of Botswana and Their Natural History](#) from the Lepidopterists' Society of Africa. The Association Vahatra has just published the bilingual English/French field guide [Dragonflies and Damselflies of Madagascar and the Western Indian Ocean Islands](#) and we are expecting stock of the Swedish guide to water beetles, [Vattenskalbaggar på Öland och i Sydöstra Småland](#), published by Bildningsförlaget. On the topic of other invertebrates, we have a new fold-out guide from the Field Studies Council, [Jellyfish and Allies of the British and Irish Coast](#), and three new books from ConchBooks: [Fossil and Recent Muricidae of the World, Part Muricopsinae, The Conchological Albums – Terrestrial Molluscs, Volume 7: Camaenidae \(3\)](#), and [The Conchological Albums – Terrestrial Molluscs, Volume 8: Camaenidae \(4\)](#).

For botanists, we have a range of different books. Falcon Guides will publish [Wildflowers of North America: A Coast-to-Coast Guide to More than 500 Flowering Plants](#) in May and we have just received stock of the privately published [A Supplement to The Liverwort Flora of the British Isles](#). Leisurely reading is provided by Oliver Rackham's [The Woods of South East Wales](#), due in July from Little Toller Books, and the paperback of [Slime: A Natural History](#), due October from Granta. Meanwhile, mycologists can look out for Geoffrey Kibby's new book [The Genus Cortinarius in Britain](#), which is due this month.

Finally, we have a selection of titles on different topics. Conservation biologists will want to take a look at [Effective Conservation: Parks, Rewilding, and Local Development](#), due May from Island Press, and the second edition of [Extinction: A Radical History](#), due June from OR Books. Readers of environmental history will be interested in [Fen, Bog & Swamp: A Short History of Peatland Destruction and Its Role in the Climate Crisis](#), due September from Fourth Estate, while on the topic of evolutionary biology we recommend [Ancestors in Evolutionary Biology: Linear Thinking about Branching Trees](#), due July from Cambridge University Press. Interesting science history comes in the form of [All the Land](#) from Seagull Books. Those looking to travel to Africa will want to consider [Stuarts' Field Guide to National Parks & Game Reserves: Namibia, Botswana, Zimbabwe, Zambia, Malawi](#), due May from Penguin Random House South Africa, while more regional natural history is provided by [The Nature of Cambridge](#), due May from NatureBureau, and [South Devon Wildlife Walks: Kingsbridge Area](#), which was just published by the author.

As always, if you are looking for a particular title that we do not yet have in our range, or you would like to suggest a title for NHBS to stock, please do get in touch. In the meantime, stay safe and keep well.
