

nhbs monthly catalogue

new and forthcoming titles

Issue: 2005/05

May 2005

customer.services@nhbs.co.uk +44 (0)1803 865913

Welcome to the May NHBS **Monthly Catalogue**, the ultimate buyer's guide to new and forthcoming titles in natural history, conservation and the environment.

What better way to start than with **The Mayflies of Europe!** Also newly available is the comprehensive **Birds of South Asia - The Ripley Guide**, and **A Field Guide to the Frogs of Borneo**.

Crossbill Guides are an exciting new series of European nature guides produced by KNNV, the Dutch conservation NGO. The first, **The Nature Guide to the Biebrza Marshes**, is just published.

Several major titles are due later this year, including **Collins Field Guide to the Mammals of Britain and Europe**, the marvellous **Flowers of Crete** and **Light on the Earth - Wildlife Photographer of the Year: Two Decades of Winning Images** - both in September. There are also two new volumes in the **Ecological Reviews Series** which continues the publications of British Ecological Society symposia under this new series title. **Biotic Interactions in the Tropics** will be published in August and **Biological Diversity and Function in Soils** in September. One title that is definitely going to be hugely important is the Wildlife Conservation Society's **State of the Wild: A Global Portrait of Wildlife, Wildlands, and Oceans** - due in October.

Two key titles from 2004 that we haven't highlighted previously are **Nature and Culture in the Democratic Republic of Congo**, and **Advanced Distance Sampling** - both of great interest.

Our **Spring Catalogue 2005** is now online! After 20 years of producing our trademark newspaper-style paper catalogues each April and October, the time has come to move on and put all of the title information we provide to customers online.
