Welcome to the May Monthly Catalogue! It's the most comprehensive buyer's guide to new and forthcoming titles in natural history, conservation and the environment.

We have just released the **NHBS Botany Catalogue 2006**. It contains over 3000 botany titles published since 2001. If you have an interest in botany, horticulture and gardening, or wild flower field guides for your next holiday, you will certainly find much of interest in this catalogue. If you can't find what you are looking for in here, there are many more older titles in the **botany section** on the NHBS website.

On our homepage at [www.nhbs.com](http://www.nhbs.com), you will find subject selections which highlight some of our favourite new books:

- **Galapagos selection**: seven outstanding titles about the Natural History of the Galapagos Islands
- **Scottish Natural History**: Nature of the Cairngorms and related titles
- **Raptors & Their Conservation**: five forthcoming and recently published books
- Watch the NHBS homepage for more...
