

August 2020 Monthly Catalogue

Welcome to the August 2020 edition of the NHBS Monthly Catalogue, which lists all new titles added to our website in the last month.

Some excellent bird titles surfaced this month. Lynx has announced [All the Birds of the World](#) for August that distils the [Handbook of the Bird of the World](#) series down to its essence. With over 20,000 illustrations and 11,000 distribution maps, it will still be a substantial book. Sergei Toropov has just published [The Birds of Pamirs, Hissar, Alai and Tien Shan. Volume 1: Non-Passerines, Part 2](#), which is the second volume in this series. Birdwatchers are served this month with [A Naturalist's Guide to the Birds of New Zealand](#), due October from John Beaufoy, and [Where to Watch Birds Eilat & Southern Arava](#), which is in stock now. Notable good reads this month are [How to Read a Bird: A Smart Guide to What Birds Do and Why](#), due September from The History Press, and [The Swallow: A Biography](#), due October from Square Peg.

There are two noteworthy books on mammals to announce this month: [Guide to the Felidae of the Indomalayan Realm](#), which is in stock now, and [A Naturalist's Guide to the Mammals of Sri Lanka](#), which is due October from John Beaufoy.

Moving on to insects and other invertebrates, the Field Studies Council has just published [Atlas of Water Beetles of Britain and Ireland – Smaller Families of Polyphaga](#), the third part of this series. Two further Naturalist's Guides from John Beaufoy are due in October and will cover the butterflies of [Peninsular Malaysia](#) and [Australia](#). CSIRO has announced [The Invertebrate World of Australia's Subtropical Rainforests](#), due later this month, while Head of Zeus will publish [The Book of the Earthworm](#) in January 2021.

On the subjects of botany and mycology there are three books to mention. Timber Press will publish [Herbarium: The Quest to Preserve and Classify the World's Plants](#) in December, a book authored by the director of the William and Lynda Steere Herbarium at the New York Botanical Garden. We have stock of the privately published [The Wild Food Plants of Ireland: The Complete Guide to Their Recognition, Foraging, Cooking, History and Conservation](#). And Houghton Mifflin Harcourt will publish the second edition of the [Peterson Field Guide to Mushrooms of North America](#) in January 2021.

There is an excellent selection of ecology titles this month. Oxford University Press will publish [Game Theory in Biology: Concepts and Frontiers](#) in September, part of their [Oxford Series in Ecology and Evolution](#), while Wiley-Blackwell has just published the second edition of [Practical Field Ecology: A Project Guide](#). Cambridge University Press will release [Salt Marshes: Function, Dynamics, and Stresses](#) in October. Regional titles come in the form of [Irish Rivers](#), just published by the University College Dublin Press, and [The Forests of California: A California Field Atlas](#), due September from Heyday Books.

Conservation biologists, meanwhile, can look out for [Conservation Physiology: Applications for Wildlife Conservation and Management](#), due November from Oxford University Press, the third edition of [Conservation Biology: Foundations, Concepts, Applications](#), just published by Springer, and [We Alone: How Humans Have Conquered the Planet and Can Also Save It](#), due January 2021 from Yale University Press. More specific topics are covered in [Future Sea: How to Rescue and Protect the World's Oceans](#), due October from the University of Chicago Press, and [The Chimpanzee & Me](#), now available in paperback. Harder to pigeonhole, but no less interesting is [Framing Nature: Conservation and Culture](#), due October from Gritstone Publishing.

On the topic of environmental issues there are three notable paperback reissues: [The Ice at the End of the World: An Epic Journey Into Greenland's Buried Past and Our Perilous Future](#) is due September from Icon Books, while [Rebirthing: Rewilding Britain and its Birds](#) (Pelagic Publishing) and [The Outlaw Ocean: Crime and Survival in the Last Untamed Frontier](#) (Vintage Books) are available now. A brand new title is [The New Climate War: The Fight to Take Back Our Planet](#), written by noted climate scientist Michael E. Mann, which will be published by Public Affairs Press in January 2021.

To see out this month's selection there are a number of titles on a range of different topics. The University of Chicago Press brings us evolutionary biology and palaeontology with, respectively, [The Evolutionary Origins of Life and Death](#), due December, and [Vanished Giants: The Lost World of the Ice Age](#), due November. MIT Press will publish the paperback of [Growth: From Microorganisms to Megacities](#) in December, and there is nature writing in the form of [The Consolation of Nature: Spring in the Time of Coronavirus](#), due October from Hodder & Stoughton.

As always, if you are looking for a particular title that we do not yet have in our range, or you would like to suggest a title for NHBS to stock, please do get in touch. In the meantime, stay safe and keep well.

The Nature of Fear

Survival Lessons from the Wild

Daniel T Blumstein(Author)

A leading expert in animal behaviour takes us into the wild to better understand and manage our fears. Fear, honed by millions of years of natural selection, kept our ancestors alive. Whether by slithering away, curling up in a ball, or standing still...

The Emotions

A Philosophical Introduction

Julien A Deonna(Editor), Fabrice Teroni(Editor)

The emotions are at the centre of our lives and, for better or worse, imbue them with much of their significance. The philosophical problems stirred up by the existence of the emotions, over which many great philosophers of the past have laboured,...

Cognition Distributed

How Cognitive Technology Extends Our Minds

Itiel E Dror(Editor), Stevan Harnad(Editor)

Our species has been a maker and user of tools for over two million years, but "cognitive technology" began with language. Cognition is thinking, and thinking has been "distributed" for at least the two hundred millennia that we...

Evolving Enactivism

Basic Minds Meet Content

Daniel D Hutto(Author), Erik Myin(Author)

An extended argument that cognitive phenomena – perceiving, imagining, remembering – can be best explained in terms of an interface between contentless and content-involving forms of cognition. Evolving Enactivism argues that cognitive...

On Certainty

And Other Philosophical Essays on Cognition

Nicholas Rescher(Author)

On Certainty continues Rescher's longstanding practice of publishing occasional studies that form part of a wider program of investigation of the scope and limits of rational inquiry in the pursuit of understanding. And pragmatism forms a...
