

# September 2020 Monthly Catalogue

Welcome to the September 2020 edition of the NHBS Monthly Catalogue, which lists all new titles added to our website in the last month.

We have some great bird titles this month. A noteworthy last-minute drop-in is the bilingual (English and Chinese) [Ageing & Sexing of Migratory East Asian Passerines](#) from Avium Förlag. The Mammal Society just published the 5th edition of [The Analysis of Owl Pellets](#), while the Lancashire & Cheshire Fauna Society released [Lancashire Bird Report 2019](#), the most recent in this annual series. We now also stock [Urban Lady: The Phenomenon of the Long-Eared Owl Wintering Grounds in the Cities of Northern Bosnia and Herzegovina](#), which is privately published. Lastly, two Dutch titles from KNNV are [De Zeearend in Nederland: In 15 Jaar naar 15 Paar](#) [The White-Tailed Eagle in the Netherlands: 15 Pairs in 15 Years] which was released in February, and [Vogels en hun Veren: Verenklee, Rui en Ruipatronen per Soortgroep](#) [Understanding Bird Molt: A Guide for the Field Ornithologist] which is due this month.

Other fauna titles this month cover mammals and insects. Meru Publishing will release [Mammals of Ethiopia, Eritrea, Djibouti and Somalia: Field Guide to the Larger Mammals of the Horn of Africa](#) in October, while Brill has announced the second edition of [Catalogue of Palaearctic Coleoptera, Volume 5: Tenebrionoidea](#), which is due this month.

Readers interested in botany and mycology will want to take a look at the Dutch field guide [Basisgids Bomen en Struiken](#) [Basic Guide to Trees and Shrubs], recently published by KNNV, and the third edition of [Where the Slime Mould Creeps](#), recently published by Tympanocryptis Press.

Conservation biology is represented this month by the recently published [Parrot Conservation: From Kakapo to Lear's Macaw: Tales of Hope From Around the World](#) from New Holland and the third edition of [The Bat House Builder's Handbook](#) from University of Texas Press, which is due this month. Readers interested in environmental issues can look forward to the paperback of Naomi Klein's [On Fire: The Burning Case for a Green New Deal](#), due this month from Penguin Books, the paperback of [Feeding Britain: Our Food Problems and How to Fix Them](#), due February from Pelican, and the second edition of [There Is No Planet B: A Handbook for the Make or Break Years](#), due January from Cambridge University Press.

For ecologists, we have [Habitat Ecology and Analysis](#) from Oxford University Press and [Pollinators & Pollination: Nature and Society](#) from Pelagic Publishing, both of which will be published in January. Palaeontologists can look out for [Fossil Spiders in Baltic Amber: An Annotated Systematic Catalogue](#), due November from Siri Scientific Press.

Finally, for those who want to stay indoors there is the second edition of [Viruses, Plagues, and History: Past, Present, and Future](#), due October from Oxford University Press, while those who wish to venture outside will want to read the paperback of [Losing Eden: Why Our Minds Need the Wild](#) from Penguin Books or [Wild Woods: An Explorer's Guide to Britain's Woods and Forests](#) from Bradt, both due in February.

As always, if you are looking for a particular title that we do not yet have in our range, or you would like to suggest a title for NHBS to stock, please do get in touch. In the meantime, stay safe and keep well.

Leon Vlieger  
Catalogue Editor

## Insects & other Invertebrates

### The Neotropical Polymorphic Earless Praying Mantises

A Taxonomic Review of the Genera and Checklist of Species

Julio Rivera(Author), Gavin J Svenson(Author)

Recent phylogenetic studies on evolutionary relationships within the Acanthopoidea, known as "polymorphic earless praying mantises", revealed numerous issues with the taxonomic status and morphological boundaries of many genera and species...

**Botany**

**Anatomy of Flowering Plants**

An Introduction to Structure and Development  
 Paula J Rudall(Author)  
 Understanding plant anatomy is not only fundamental to the study of plant systematics and palaeobotany, but is also an essential part of evolutionary biology, physiology, ecology and the rapidly expanding science of developmental genetics. This...

### What Really Counts

The Case for a Sustainable and Equitable Economy

Ronald Colman(Author)

Politicians and economists fixate on "growing the economy" – measured by a country's gross domestic product. But this yardstick counts harmful activities such as greenhouse gas emissions, plastic waste, and cigarette sales as...

### Green Meat?

Sustaining Eaters, Animals, and the Planet

Ryan M Katz-Rosene(Editor), Sarah J Martin(Editor)

It seems an irrefutable truth that raising animals for meat has become unsustainable. Land is being eroded and destroyed, water resources overdrawn, greenhouse gases overemitted, and energy and crops unnecessarily diverted – all to satiate a...

### Powering Empire

How Coal Made the Middle East and Sparked Global Carbonization

On Barak(Author)

The Age of Empire was driven by coal, and the Middle East – as an idea – was made by coal. Coal's imperial infrastructure presaged the geopolitics of oil that wreaks carnage today, as carbonization threatens our very climate. Powering...
