

September 2021 Monthly Catalogue

Welcome to the September 2021 edition of the NHBS Monthly Catalogue, which lists all new titles added to our website in the last month.

We have a bumper crop of bird titles this time. For seabird enthusiasts, there will be another option to consider as Princeton University Press has just announced [Gulls of Europe, North Africa, and the Middle East: An Identification Guide](#), due November. More field guides are coming from Helm in February: [Birds of Sri Lanka](#), as part of a new series called Helm Wildlife Guides, and the second edition of [Birds of Ghana](#). Closer to home we have the third edition of [Tracks & Signs of the Birds of Britain and Europe](#), due December from Bloomsbury, and the 2022 edition of [The Birdwatcher's Yearbook](#), due October from Calluna Books. Other interesting reads on birds are [The Secret Perfume of Birds: Uncovering the Science of Avian Scent](#), due March from Johns Hopkins University Press, and Stephen Moss's [The Swan: A Biography](#), due November from Square Peg. It is that time of year again, and this month HarperCollins will publish [Bird Photographer of the Year, Collection 6](#). Regarding other vertebrate groups, we have [All Asian Primates](#) from Lynx.

Furthermore, there are some stellar entomology titles. Volume 11 of the British Wildlife Collection, due February from Bloomsbury, is [Ants: The Ultimate Social Insects](#). The British Entomological and Natural History Society has just published [British Craneflies](#) while the London Natural History Museum has just released the paperback of [The Inside Out of Flies](#). For lepidopterologists, there is a new instalment in the Guide to the Butterflies of the Palearctic Region series, [Satyrinae Part 6: Tribe Satyrini, Genus Karanasa](#). In the category of other invertebrate groups, Head of Zeus will publish the paperback of [The Book of the Earthworm](#) in November.

For conservation biologists, we have four noteworthy titles to highlight this month. Oxford University Press will publish [Conserving the Oceans: The Politics of Large Marine Protected Areas](#) this month, while Island Press will publish [Swamplands: Tundra Beavers, Quaking Bogs, and the Improbable World of Peat](#) next month. Two books lined up for February 2022 are [Tickets for the Ark: From Wasps to Whales – How Do We Choose What to Save?](#) from Profile Books and [The Conservation and Biogeography of Amphibians in the Caribbean](#) from Pelagic Publishing, which is volume 9, part 5 in the Amphibian Biology series.

On the topic of climate change and other environmental issues, we have [Earthshot: How to Save Our Planet](#), due this month from John Murray, and [Thicker Than Water: The Quest for Solutions to the Plastic Crisis](#), due next month from Island Press. Then there are two paperback reissues: [The Contamination of the Earth: A History of Pollutions in the Industrial Age](#), due November from MIT Press, and Naomi Klein's [How To Change Everything: The Young Human's Guide to Protecting the Planet and Each Other](#), due February from Penguin Books.

Readers interested in evolution and palaeontology can look forward to [Drawing and Painting Dinosaurs: Using Art and Science to Bring the Past to Life](#) from Crowood Press in October and the paperback of [Fossil Men: The Quest for the Oldest Skeleton and the Origins of Humankind](#) due this month from William Morrow. Two other titles to look out for next year are [Otherlands: A World in the Making](#) from Allen Lane and [Explorers of Deep Time: Paleontologists and the History of Life](#) from Columbia University Press.

Finally, October will see the publication of [Wildlife Photographer of the Year, Portfolio 31](#) from the London Natural History Museum and [Scientist: E. O. Wilson: A Life in Nature](#) from Doubleday.

As always, if you are looking for a particular title that we do not yet have in our range, or you would like to suggest a title for NHBS to stock, please do get in touch. In the meantime, stay safe and keep well.

The Seneca Effect

Why Growth is Slow but Collapse is Rapid

Ugo Bardi(Author)

The essence of this book can be found in a line written by the ancient Roman Stoic Philosopher Lucius Annaeus Seneca: "Fortune is of sluggish growth, but ruin is rapid". This sentence summarizes the features of the phenomenon that we call...

Vertebrate Cranial Placodes (2-Volume Set)

Gerhard Schlosser(Author)

Most of the cranial sense organs of vertebrates arise from embryonic structures known as cranial placodes. Such placodes also give rise to sensory neurons that transmit information to the brain as well as to many neurosecretory cells. Vertebrate...
