# new and forthcoming titles

#### October 2007

# Issue: 2007/10 www.nhbs.com\_customer.services@nhbs.co.uk\_+44 (0)1803 865913

Welcome to the October Monthly Catalogue, the most comprehensive buyer's guide to new and forthcoming titles in natural history, conservation and the environment.

The arrival of two books in our warehouse always marks the beginning of the busiest season of the year for us, and they both came into stock this week: The new volume in the HBW series: Handbook of the Birds of the World. Volume 12:

Picathartes to Tits and Chickadees

The latest Portfolio of the Wildlife Photographer of the Year competition: <u>Wildlife</u> <u>Photographer of the Year, Portfolio Seventeen</u>

We are updating the selection of books on the www.nhbs.com homepage frequently, to keep you informed about exciting titles new in stock at NHBS.

# New subject catalogue: Marine Biology

NHBS cataloguer Anneli Meeder recently attended the annual IAMSLIC conference (International Association of Aquatic and Marine Science Libraries and Information Centers) in Florida, and we have used this occasion to compile a new catalogue on the subject. It presents the best of the past few years of marine and aquatic biology publishing, and is now available. This catalogue can be viewed online, or downloaded as a pdf-file for printing.

# Other subject catalogues currently available:

<u>NHBS Botany Catalogue Autumn 2007 (pdf-file, 4MB)</u> <u>NHBS Field Ecology 2007 (pdf-file, 2.7MB)</u> NHBS Ornithology Catalogue Summer 2007 (pdf-file, 1.5MB)

# Services for libraries and organisations

NHBS provides a comprehensive service to libraries and organisational buyers: Secure international delivery with flexible returns Competitive discounting with multi-currency invoicing on credit accounts Standing orders and series management Title research service for any book in print in any language Personal and responsive customer service from our experienced team

#### The NHBS Team

View this Monthly Catalogue as a <u>web page</u> or save/print it as a <u>.pdf</u> document.

MATLAB Demystified David McMahon This self-teaching guide is the fast and easy way for anyone to learn to use MATLAB software to solve computational problems. Packed with hundreds of sample equations and	336 pages   McGraw Hill Pbk   2007   0071485511   #171089A   <b>£12.99 <u>Add to basket</u></b>
A Primer on Linear Models John Monahan Since the linear model forms the groundwork for most applied statistics, a course on the theory of the linear model is often required in most graduate statistics programs. A	200 pages   Chapman & Hall (CRC Press) Hbk   NYP 01/2008   1420062018   #171414A   <b>£31.99 <u>Add to basket</u></b>
Principles of Modeling Uncertainties in Spatial Data and SpatialAnalysisShi WenzhongModeling uncertainties in geographic information science is essential to the development of the	350 pages   CRC Press Hbk   NYP 03/2008   1420059270   #171405A   <b>£67.99 <u>Add to basket</u></b>
field. This book addresses one of the fundamental theoretical issues:  Probability and Random Processes with R Kenneth Baclawski Based on the popular probability course by Gian-Carlo Rota of MIT, Probability and Random Processes with R provides a calculus-based introduction to probability. The text	384 pages   Chapman & Hall (CRC Press) Hbk   NYP 01/2008   1420065211   #171413A   <b>£39.99 <u>Add to basket</u></b>
Python for Bioinformatics Sebastian Bassi Python is a popular computer language used in a wide range of applications, from peer-to-peer software to dynamic generated web pages. Python for Bioinformatics provides	456 pages   Chapman & Hall (CRC Press) Pbk   NYP 03/2008   1584889292   #171395A   <b>£31.99 <u>Add to basket</u></b>
Remote Sensing of the European Seas Edited by Vittorio Barale and Martin Gade The enclosed and marginal seas surrounding the European continent exhibit a wide spectrum of environmental traits, ranging from sub-polar to sub-tropical climates, from	325 pages   120 illus   Springer Hbk   NYP 02/2008   1402067712   #171213A   <b>£100.00 <u>Add to basket</u></b>
Sampling Techniques for Forest Inventories Daniel Mandallaz Sound forest management planning requires cost-efficient approaches to optimally utilize the given resources. Emphasizing the mathematical and statistical features of forest	272 pages   Chapman & Hall (CRC Press) Hbk   NYP 01/2008   1584889764   #171418A   <b>£44.99 <u>Add to basket</u></b>
Signal Processing for Remote Sensing CH Chen Highlighting the data acquisitions segment of remote sensing, this book covers Normalized Hilbert Transfroms and Its Applications, Statistical Pattern Recognition,	280 pages   CRC Press Hbk   NYP 01/2008   1420066668   #171408A   <b>£49.99 <u>Add to basket</u></b>

Struck by Lightning The Curious World of Probabilities Jeffrey S Rosenthal Human beings have long been both fascinated and appalled by randomness. On the one hand, we love the thrill of a surprise party or the freedom of not knowing what tomorrow will	288 pages   Granta Pbk   NYP 03/2008   186207996X   #171380A   <b>£8.99 <u>Add to basket</u></b>
Topographic Laser Ranging and Scanning Principles and Processing Joe Shan and Charles K Toth This volume provides the first systematic, yet in-depth, introduction to the basic theories and principles of LiDAR (Light Detection and Ranging) technology and data	500 pages   CRC Press Hbk   NYP 02/2008   1420051423   #171410A   <b>£67.99 <u>Add to basket</u></b>
