

# November 2020 Monthly Catalogue

Welcome to the November 2020 edition of the NHBS Monthly Catalogue, which lists all new titles added to our website in the last month.

We have some excellent bird titles lined up this month, a particular highlight being the [European Breeding Bird Atlas 2: Distribution, Abundance and Change](#) that has been announced by Lynx for December. We now have stock of the second edition of [Birding Estonia](#), published by Eesti Loodusfoto. Two wide-coverage field guides are the 6th edition of the [RSPB Birds of Britain and Europe: The Definitive Photographic Field Guide](#), published by Dorling Kindersley, and [The National Audubon Society Book of Birds of North America](#), due April from the Knopf Publishing Group. Those interested in a good read will want to look out for [A World on the Wing: The Global Odyssey of Migratory Birds](#), due March from W.W. Norton & Co., [A Most Remarkable Creature: The Hidden Life and Epic Journey of the World's Smartest Bird of Prey](#), which is a book on the striated caracara, due April from Bodley Head, or [The Glitter in the Green: In Search of Hummingbirds](#), due April from Basic Books.

Three noteworthy mammal titles are [RSPB Spotlight: Seals](#), due March from Bloomsbury, the paperback of [Elephants: Birth, Death & Family in the Lives of the Giants](#), due April from Harper Collins, and [Track and Sign: A Guide to the Field Signs of Mammals and Birds of the UK](#), due December from The History Press.

For entomologists, we have a big reveal this month. Volume 10 in the British Wildlife Collection, due April from Bloomsbury, is titled [Butterflies](#) and will be written Martin Warren, who was the Chief Executive of Butterfly Conservation until his recent retirement. The Amateur Entomologists' Society has just published the third edition of [A Guide to Moth Traps and Their Use](#) and we will soon be distributing the privately published monograph [Mylothris: A Revision of the Afrotropical Pierid Genus with Descriptions of New Species](#). Pelagic Publishing will reissue the Naturalists' Handbook [Aphids on Deciduous Trees](#) this month, which has been unavailable for some time. Lastly, Springer will publish [Stingless Bees: Their Behaviour, Ecology and Evolution](#) in December.

For those botanists who missed out the first time around, we now have stock of the reprint of John Poland's [The Field Key to Winter Twigs: A Guide to Native and Planted Deciduous Trees, Shrubs and Woody Climbers \(Xylophytes\) Found in the British Isles](#), which includes corrections. We also received word from the Instituto Multidisciplinario de Biología Vegetal in Argentina that the next volume of the Flora Vascular de la República Argentina, [Volume 19\(1\): Dicotyledoneae: Caryophyllales \(p.p.\), Ericales \(p.p.\), Gentianales \(p.p.\)](#), will be published in November. For mycologists we have [Secretive Slime Moulds: Myxomycetes of Australia](#), due January from CSIRO, and [In Search of Mycotopia: Citizen Science, Fungi Fanatics, and the Untapped Potential of Mushrooms](#), due April from Chelsea Green.

On the topic of conservation biology, we have three superb titles lined up. Johns Hopkins University Press has just published the 8th edition of [The Wildlife Techniques Manual](#), while Pelagic Publishing has announced [The Handbook of Acoustic Bat Detection](#) for January. Mary Colwell, who previously wrote [Curlew Moon](#), is working on [Beak, Tooth and Claw: Why Predators are Needed for a Healthy British Countryside](#), due April from Harper Collins. Those interested in environmental issues will want to look out for [Under a White Sky: The Nature of the Future](#), due April from Bodley Head, in which Elizabeth Kolbert of Sixth-Extinction fame will explore the controversial topic of geoengineering. Two paperback rereleases are [Our House is on Fire: Scenes of a Family and a Planet in Crisis](#), due March from Penguin Books, and [The Future We Choose: Surviving the Climate Crisis](#), due April from Manilla Press.

There are several interesting (environmental) history titles in the pipeline for April. Oxford University Press has announced Vaclav Smil's next book, [Grand Transitions: How the Modern World Was Made](#). Two paperback rereleases are [Rivers of Power: How a Natural Force Raised Kingdoms, Destroyed Civilizations, and Shaped Our World](#) from Penguin Books and [The Multifarious Mr Banks: From Botany Bay to Kew, The Natural Historian Who Shaped the World](#) from Yale University Press.

Another big announcement is the next New Naturalist, [Peak District](#), which is due April from Harper Collins. Other natural history titles are [Capturing Motion: My Life in High-Speed Nature Photography](#) from Firefly Books and the privately published [Pudding-Pokes, Flittermice and Bishy-Barney-Bees: How Our Ancestors Referred to the Natural World](#), both of which are in stock now. Elliott & Thompson has just published the paperback of [Wintering: A Season with Geese](#), while Simon & Schuster will publish the paperback of [On the Marsh: A Year Surrounded by Wildness and Wet](#) in April. A final noteworthy paperback rerelease is [Natural: The Seductive Myth of Nature's Goodness](#), due April from Profile Books.

As always, if you are looking for a particular title that we do not yet have in our range, or you would like to suggest a title for NHBS to stock, please do get in touch. In the meantime, stay safe and keep well.
