

# January 2023 Monthly Catalogue

Welcome to the January 2023 edition of the NHBS Monthly Catalogue, which lists all new titles added to our website in the last month.

This month we present a small selection of books covering various vertebrate groups, starting with birds. Academic Press will publish the second edition of Ian Newton's monograph [The Migration Ecology of Birds](#) in June. The Hong Kong Birdwatching Society has just published the ninth edition of the bilingual [HKBWS Field Guide to the Birds of Hong Kong and South China](#). First published in 1977, the previous eight editions of this important guidebook were simply titled The Birds of Hong Kong and South China. We also have stock of the bilingual [Barcelona Falcons: The Daily Life of Urban Falcons](#), published by Oriol Alamy. For mammals and fish, we have one title each. Academic Press will release the second edition of [Snow Leopards](#) in June, which is part of their [Biodiversity of the World: Conservation from Genes to Landscapes](#) series, and Wild Nature Press has announced [Inshore Fishes of Britain and Ireland](#) for April, which is part of their [Seasearch Guides](#) series.

This month's entomology section is well-stocked with some outstanding new titles. Three new books that NHBS is distributing are [Butterfly Conservation: The Warwickshire Approach](#), published by Butterfly Conservation Warwickshire; [Guide to the Butterflies of Honduras](#), privately published by Robert Gallardo; and [The Macaronesian Laparocerus: Taxonomy, Phylogeny and Natural History](#), published by Turquesa Publicaciones. The Freshwater Biological Association just released [British and Irish Stoneflies \(Plecoptera\): Key to the Adults and Larvae With Notes on Their Distribution, Life Histories and Ecology](#) and Princeton University Press has announced [Honey Bee Biology](#) for June. Last but not least on this list are two forthcoming New Naturalists from HarperCollins: [Solitary Bees](#), due in April, and [Shieldbugs](#), due in June. Although on molluscs, not insects, there are two more books worth mentioning here just published by ConchBooks: [European Door Snails \(Clausiliidae\), Volume 1: Taxonomy, Phylogeny, Species Concept](#) and [The Conchological Albums – Terrestrial Molluscs, Volume 11: Camaenidae \(7\), Canariellidae, Caryodidae, Cepolidae, Cerastidae](#).

There is a shorter list for botanists this month. Royal Botanic Gardens, Kew has announced [The Kew Temperate Plant Families Identification Handbook](#) for February, which is a companion to their tropical plant families handbook published back in 2015. Greystone Books is publishing Peter Wohlleben's next book [The Power of Trees: How Ancient Forests Can Save Us if We Let Them](#) in April. Lastly, we have stock of the [Illustrated Flora of Morocco](#), privately published by Gerhard Pils.

We have a strong list of conservation-oriented titles. Cambridge University Press has revealed two large books: [Threatened and Recently Extinct Vertebrates of the World: A Biogeographic Approach](#), due in March, and [Nature Conservation in Europe: Approaches and Lessons](#), due in June. Meanwhile, Pelagic Publishing has announced [Traffication: How the Car Killed the Countryside](#) for May, and the UK Overseas Territories Conservation Forum will release [When the Kite Builds... Why and How We Restored Red Kites across Britain](#) in March. We have stock of [Gardening for Gorillas: Trials, Tricks, and Triumphs of a Zoo Horticulturalist](#), published by Orla Kelly Publishing. Lastly, there are paperback reprints in the pipeline for [The Insect Crisis: The Fall of the Tiny Empires that Run the World](#), due in March from Atlantic Books, and [Ever Green: Saving Big Forests to Save the Planet](#), due in April from W.W. Norton. On the topic of other environmental issues, there is one new title, [Vanishing Sands: Losing Beaches to Mining](#) from Duke University Press, and two paperback reprints: [Land Healer: How Farming Can Save Britain's Countryside](#), due in March from BBC Books, and [Sixty Harvests Left: How to Reach a Nature-Friendly Future](#), due in June from Bloomsbury.

To see out this month is a tranche of titles that range across subjects. There are three really interesting environmental history books coming. Pelagic Publishing is releasing [The Atlas of Early Modern Wildlife: Britain and Ireland between the Middle Ages and the Industrial Revolution](#) in June. Bloomsbury is publishing [The Earth Transformed: An Untold History](#) in March, which is authored by Peter Frankopan who readers might recognise from two previous history bestsellers, *The Silk Roads* and *The New Silk Roads*. Princeton University Press, then, is reissuing [Plagues upon the Earth: Disease and the Course of Human History](#) in paperback in June. Another paperback reprint, but on the topic of palaeontology, is [The Rise and Reign of the Mammals: A New History, from the Shadow of the Dinosaurs to Us](#), due in June from Picador. Two interesting popular biology titles are [The Liars of Nature and the Nature of Liars: Cheating and Deception in the Living World](#), due in May from Princeton University Press, and the paperback reprint of [Secret Worlds: The Extraordinary Senses of Animals](#), due in June from Oxford University Press. A noteworthy biography is [The Swimmer: The Wild Life of Roger Deakin](#), coming in May from Hamish Hamilton. Finally, Dutch publisher KNNV is publishing [Crossbill Guide: Southern Morocco](#) this month.

As always, if you are looking for a particular title that we do not yet have in our range, or you would like to suggest a title for NHBS to stock, please do get in touch.

Best wishes for 2023,  
Leon Vlieger  
Catalogue Editor

## Insects & other Invertebrates

<p><b>Marienkäfer [Ladybirds]</b> Bernhard Klausnitzer(Author), Hertha Klausnitzer(Author), Ekkehard Wachmann(Author) Who doesn't know them, the colourful lucky charms, children's favourites. In this book, you will read about the rich cultural and economic relationships between ladybirds (Coccinellidae) and humans, including their migrations. Most ladybirds...</p>	<p>568 pages   347 colour &amp; 215 b/w photos   VerlagsKG Wolf (formerly Westarp Wissenschaften)</p> <table border="1"> <tbody> <tr> <td>Paperback</td> <td>#259662</td> <td>2022</td> <td>9783894327217</td> <td><b>£49.99</b></td> </tr> </tbody> </table>	Paperback	#259662	2022	9783894327217	<b>£49.99</b>

### The Insect Crisis

The Fall of the Tiny Empires that Run the World  
Oliver Milman(Author)

When is the last time you were stung by a wasp? Or were followed by a cloud of midges? Or saw a butterfly? All these normal occurrences are becoming much rarer. A groundswell of research suggests insect numbers are in serious decline all over the...

260 pages | no illustrations | Atlantic Books

Paperback	#259648	Mar-2023	9781838951191	£10.99
Hardback	#254250	2022	9781838951177	£16.99

### The Jewel Box

How Moths Illuminate Nature's Hidden Rules  
Tim Blackburn(Author)

Every morning, ecologist Tim Blackburn is inspired by the diversity contained within the moth trap he runs on the roof of his London flat. Beautiful, ineffably mysterious organisms, these moths offer a glimpse into a larger order, one that extends...

352 pages | Weidenfeld & Nicolson

Hardback	#257613	Jun-2023	9781474624527	£19.99
----------	---------	----------	---------------	--------

### Honey Bee Biology

Brian R Johnson(Author), Thomas D Seeley(Foreword By)

Honey bees are marvellously charismatic organisms with a long history of interaction with humans. They are vital to agriculture and serve as a model system for many basic questions in biology. This authoritative book provides an essential overview of...

512 pages | 16 colour & 101 b/w illustrations, 13 tables | Princeton University Press

### The Culture of Stopping

Harald Welzer(Author), Sharon Howe(Translated by)

Our culture has no concept of stopping. We continue to build motorways and airports for a future in which cars and planes may no longer exist. We're converting our planet from a natural one to an artificial one in which the quantity of man-made...

## Organismal to Molecular Biology

### Life's Engines

How Microbes Made Earth Habitable

Paul G Falkowski(Author)

For almost four billion years, microbes had the primordial oceans all to themselves. The stewards of Earth, these organisms transformed the chemistry of our planet to make it habitable for plants, animals, and us. Life's Engines takes readers...

### The Liars of Nature and the Nature of Liars

Cheating and Deception in the Living World

Lixing Sun(Author)

Nature is rife with cheating. Possums play possum, feigning death to cheat predators. Crows cry wolf to scare off rivals. Amphibians and reptiles are inveterate imposters. Even genes and cells cheat. The Liars of Nature and the Nature of Liars...
