

# July 2025 Monthly Catalogue

Welcome to the July 2025 edition of the NHBS Monthly Catalogue, which lists all new titles added to our website in the last month.

We open this month with several interesting books on major animal groups. Mammal workers will want to take note that Anthony J. Mitchell-Jones, together with a team of co-editors, is working on the second edition of [Atlas of European Mammals](#), revisiting this title 25 years after the publication of the first edition with Poyser. The second edition is due in December and will be published by CRC Press. Meanwhile, [Stuarts' Field Guide to Mammals of Southern Africa](#) will enter its sixth edition, and is due in November from Zebra Press. For birdwatchers, we have the [Struik Pocket Guide: Birds of Botswana](#), due in August from Penguin Random House South Africa, and [The Social Lives of Birds](#), due in September from Headline Book Publishing.

For herpetologists, two relevant titles are due from Edition Chimaira in September: [Amphibians and Reptiles of the Peloponnese](#) and [Anolis: Natural History and Captive Care of Selected Species](#). For marine biologists, we are excited to announce that NHBS will be distributing the [Field Guide to Manta & Devil Rays of the World](#) from the Manta Trust, an innovative book that guides readers through four different identification pathways. It will be accompanied by simultaneous translations into [French](#), [Spanish](#), and [Portuguese](#). Meanwhile, Bloomsbury will publish the second edition of [Marine Life of the Caribbean](#) in November.

Turning to insects and other invertebrates, the FSC has just released two new AIDGAP guides, [Micro Ladybirds of Britain and Ireland: A Guide to the Smaller Species of Coccinellidae](#) and [Social Wasps of Britain and Ireland](#), while NAP Editions has just published [Neuropteroids of Europe: Neuroptera, Trichoptera, Plecoptera, Mecoptera, Megaloptera and Raphidioptera](#). For malacologists, a group we rarely call out, we have three new titles from ConchBooks: [Marine Bivalves of Namibia](#), the two-volume set [Malacofauna Turcica: The Terrestrial Gastropoda of Türkiye](#), and [The Recent Colloniidae, Volume 2](#).

Three botanical titles of note this month are the FSC fold-out guide [Urban Plants of Scotland and Northern England](#); the paperback rerelease of [Oaklore: Adventures in a World of Extraordinary Trees](#), due in August from Greystone Books; and the paperback rerelease of [The Hidden Company That Trees Keep: Life from Treetops to Root Tips](#), due in November from Princeton University Press.

In December, the University of Chicago Press will publish two academic books on ecology that reflect on the discipline itself: Daniel Simberloff is working on [Ecological Explosions: The History of Biological Invasions and Invasion Science](#), while Jeremy Fox in [The Ecology of Ecologists: Harnessing Diverse Approaches for a Stronger Science](#) lifts the lid on the many different ways in which ecology is studied. Turning to the history of domestication, the Paris MNHN has just published [Exploring the History of Turkey Management and Domestication: A Transatlantic Perspective](#).

Finally, three good reads are the bestselling nature writing title [Raising Hare](#), now out in paperback from Canongate, and paperback reissues of Andrea Wulf's [The Invention of Nature: The Adventures of Alexander Von Humboldt, the Lost Hero of Science](#) and Sir David Attenborough's [Adventures of a Young Naturalist](#), both due in August under the new John Murray Classics banner.

As always, if you are looking for a particular title that we do not yet have in our range, or you would like to suggest a title for NHBS to stock, please do get in touch.

## Cohabiting Earth

Seeking a Bright Future for All Life

Joe Gray(Editor), Eileen Crist(Editor), Stephanie Mills(Foreword By)

This anthology argues that harmony between humanity and our home planet must be built on the pillars of restraint, respect, and reverence. The eco-catastrophes that we are witnessing today starkly demonstrate how the interests of the Earth's...
