

# August 2022 Monthly Catalogue

Welcome to the August 2022 edition of the NHBS Monthly Catalogue, which lists all new titles added to our website in the last month.

Two interesting mammal titles this month are the identification swatch [Ireland's Biodiversity: Terrestrial Mammals](#), published by the Irish National Biodiversity Data Centre, and Michael Stephen Clark's book [The Fragmented World of the Mongoose Lemur](#). Those interested in birds can look out for [101 Curious Tales of East African Birds: A Brief Introduction to Tropical Ornithology](#), due in November from Pelagic Publishing, and [In a Class of Their Own: A Detailed Examination of Avian Forms and Functions](#), due in January from Springer.

On the subject of insects and other invertebrates, there is a diverse selection this month. Available now are [British Coleopterists: Biographies, Collections, Sources](#) from Malthouse Books, the second edition of [Common Micro-Moths of Berkshire: A Guide to Identification of Some Common Micro-Moths](#) from the Berkshire Moth Group Publishing (the species included are common across the whole of South England), the second edition of the fold-out guide [Harvestmen of the British Isles](#) from the Field Studies Council, and [The Conchological Albums – Terrestrial Molluscs, Volume 10: Camaenidae \(6\)](#) from ConchBooks. [Planktonia: The Nightly Migration of the Ocean's Smallest Creatures](#) is due in October from Firefly Books.

For botanists, there are two interesting books due in January: [Seaweeds of the World: A Guide to Every Order](#) from Princeton University Press and the paperback of [The Treeline: The Last Forest and the Future of Life on Earth](#) from Vintage.

We have a large selection of titles on wildlife conservation. Practical issues are covered by [Thermal Imaging for Wildlife Applications](#), due in January from Pelagic Publishing, [A Practical Guide to DNA-Based Methods for Biodiversity Assessment](#), just published by Pensoft, and [Solid Air: Invisible Killer: Saving Billions of Birds from Windows](#), released by Hancock House Publishers. More theoretical is [What Species Mean: A User's Guide to the Units of Biodiversity](#), which has just been published in paperback by CRC Press. Two books covering regional issues are [Coral Reefs of Australia: Perspectives from Beyond the Water's Edge](#), due in November from CSIRO, and [Masters of the Lost Land: The Untold Story of the Fight to Own the Amazon](#), due in January from Atlantic Books. A diverse range of environmental issues are covered by the paperback of [How to Avoid a Climate Disaster: The Solutions We Have and the Breakthroughs We Need](#), due in August from Penguin Books, [The Progress Illusion: Reclaiming Our Future from the Fairytale of Economics](#), due in December from Island Press, and [Salmon Wars: The Dark Underbelly of Our Favorite Fish](#), due in August from St Martin's Press.

For ecologists, we have [Cave Biodiversity: Speciation and Diversity of Subterranean Fauna](#), due in January from Johns Hopkins University Press, and [Harbour Ecology: Environment and Development in Poole Harbour](#), due in September from Pelagic Publishing. Two paperback rereleases are [Swamplands: Tundra Beavers, Quaking Bogs, and the Improbable World of Peat](#), due in August from Island Press, and [A Natural History of the Future: What the Laws of Biology Tell Us About the Destiny of the Human Species](#), due in January from John Murray.

Lastly, we have a smattering of books covering different topics. Readers interested in nature writing can look out for Ronald Blythe's [Next to Nature: A Lifetime in the English Countryside](#), due in October from John Murray. Two popular science titles due in January are [Viruses: A Natural History](#) from Princeton University Press, and [If Nietzsche Were a Narwhal: What Animal Intelligence Reveals about Human Stupidity](#) from Hodder & Stoughton. On history of science, we have [Coenraad Jacob Temminck and the Emergence of Systematics \(1800–1850\)](#), recently published by Brill. Finally, seeing the wide use of the statistical programming language R in biological and ecological circles, of note is the third edition of [The R Book](#), due in September from John Wiley.

As always, if you are looking for a particular title that we do not yet have in our range, or you would like to suggest a title for NHBS to stock, please do get in touch. In the meantime, stay safe and keep well.

## Habitats & Ecosystems

### Creating and Restoring Wetlands

From Theory to Practice

Christopher B Craft(Author)

Creating and Restoring Wetlands: From Theory to Practice, Second Edition describes the challenges and opportunities relating to the restoration of freshwater and estuarine wetlands in natural, agricultural, and urban environments in the coming...

464 pages | b/w photos, b/w illustrations, tables | Elsevier

Paperback	#257904	2022	9780128239810	£107.00
-----------	---------	------	---------------	---------

### Jungle

How Tropical Forests Shaped the World - and Us

Patrick Roberts(Author)

For many of us, jungles are the domain of films like Tarzan or Cast Away and feel far removed from our everyday lives. But across the entire world they influence temperature, create rainfall, clean the air, stabilise soils, and provide food and...

413 pages | 8 plates with colour photos and colour illustrations; b/w photos, b/w illustrations | Penguin Books

Paperback	#255442	2022	9780241990780	£10.99
-----------	---------	------	---------------	--------

### The Bahia Blanca Estuary

Ecology and Biodiversity

Sandra M Fiori(Editor), Paula D Pralongo(Editor)

The Bahia Blanca Estuary is one of the largest coastal systems in Atlantic South America. This mesotidal estuary, situated in a sharp transition between humid subtropical and semiarid climates, has a unique combination of large interannual...

584 pages | 72 colour & 23 b/w illustrations | Springer Nature

### The Progress Illusion

Reclaiming Our Future from the Fairytale of Economics  
Jon D Erickson(Author), Herman E Daly(Foreword By)  
We live under the illusion of progress: as long as GDP is going up and prices stay low, we accept poverty and pollution as unfortunate but inevitable byproducts of a successful economy. In fact, the infallibility of the free market and the necessity...

Paperback #258101 Dec-2022 9781642832525 £23.99

### Climate Change Adaptation

An Earth Institute Sustainability Primer  
Lisa Dale(Author)  
Climate change policy has typically emphasized mitigation, calling for reducing emissions and shifting away from fossil fuels. Yet while these efforts have floundered, floods, wildfires, droughts, and other disasters are becoming more frequent and...

### Global Environmental Politics

The Transformative Role of Emerging Economies  
Johannes Urpelainen(Author)  
Emerging economies have fundamentally transformed global environmental politics. Led by China and India, they increasingly make or break international negotiations, which now require agreement among a large number of governments with widely varied...

### Understanding the Rights of Nature

A Critical Introduction  
Mihnea Tănăsescu(Author)  
Rivers, landscapes, whole territories: these are the latest entities environmental activists have fought hard to include in the relentless expansion of rights in our world. But what does it mean for a landscape to have rights? Why would anyone want...

### An Inconvenient Apocalypse

Environmental Collapse, Climate Crisis, and the Fate of Humanity  
Wes Jackson(Author), Robert Jensen(Author)  
Confronting harsh ecological realities and the multiple cascading crises facing our world today, An Inconvenient Apocalypse argues that humanity's future will be defined not by expansion but by contraction. For decades, our world has understood...

### Ten Tomatoes that Changed the World

A History  
William Alexander(Author)  
The tomato gets no respect. Never has. Lost in the dustbin of history for centuries, accused of being vile and poisonous, subjected to being picked hard-green and gassed, even used as a projectile, the poor tomato has become the avatar for our...

## Organismal to Molecular Biology

### Vertebrate Life

F Harvey Pough(Author), William E Bemis(Author), Betty Anne McGuire(Author), Christine M Janis(Author)

Vertebrate Life distils the necessary information from vertebrate anatomy, physiology, ecology, and behavioural studies and then helps students see important connections across levels of biological scale. The result is students come to understand how...

### An Internet in Your Head

A New Paradigm for How the Brain Works

Daniel Graham(Author)

Whether we realize it or not, we think of our brains as computers. In neuroscience, the metaphor of the brain as a computer has defined the field for much of the modern era. But as neuroscientists increasingly reevaluate their assumptions about how...
