

November 2023 Monthly Catalogue

Welcome to the November 2023 edition of the NHBS Monthly Catalogue, which lists all new titles added to our website in the last month.

We open this month with a selection of books on vertebrates. Three upcoming bird field guides are [A Field Guide to the Birds of Malaysia: Including Sabah and Sarawak](#), due in March from John Beaufoy; [Where to Watch Birds in Southeast England: Essex, London and Kent](#); and [RSPB Birds of the British Isles](#), both of which are due in April from Bloomsbury. Princeton University Press has announced the second edition of [Avian Architecture: How Birds Design, Engineer, and Build](#) for February. On the subject of herpetology, we have two noteworthy books due in April: [Tortoises of the World: Giants to Dwarfs](#) from Johns Hopkins University Press and [Frogs of the World: A Guide to Every Family](#) from Princeton University Press. Lastly, Bloomsbury will release the second edition of [Marine Life of the Mediterranean](#) in April.

On the subject of invertebrates, we have some exciting and unusual guides. Entomologists can look out for the paperback of [A Dipterist's Handbook](#) from the Amateur Entomologists' Society, available now. Princeton University Press has announced two further additions to their Guides to Every Family series, both due in April: [Wasps of the World: A Guide to Every Family](#) and [Shells of the World: A Natural History](#). A more specialist mollusc book of interest is [A Guide to the Hunter Shells, Volume 2: The Streptaxoidea: The Ennienae, Orthogibbinae, Marconiinae, Odontartemoninae, Streptaxinae and the Diapheridae](#) from ConchBooks, available now. Lastly, we have books on marine and freshwater invertebrates more generally with [Plankton: A Worldwide Guide](#), due in April from Princeton University Press, and two self-published practical guides for microscopists that are in stock now: [A Beginners Guide to Freshwater Microscopic Life](#) and [An Illustrated Guide to the Freshwater Protozoa](#).

For botanists, we have four excellent titles. Kew Botanic Gardens has just announced [Palms of New Guinea](#), due in March; Pelagic Publishing will release [A Field Guide to Urban Plants: The Flora of Pavements, Walls and Waste Ground](#) in April; and Broken Hill Publishers has revealed [Atlas of the Hellenic Flora \(3-Volume Set\)](#) for January. Already out for a while but only just brought to our attention is the second edition of [Le Roux and Müller's Field Guide to the Trees & Shrubs of Namibia](#) from Namibia Publishing House.

There are some really interesting titles on wildlife conservation and other environmental issues in the pipeline. Bloomsbury will publish [Groundbreakers: The Return of Britain's Wild Boar](#) in February and the paperback of [Fevered Planet: How Diseases Emerge When We Harm Nature](#) in April, while Chelsea Greene has announced Derek Gow's next book [Hunt for the Shadow Wolf: The Lost History of Wolves in Britain and the Myths and Stories That Surround Them](#), which is due in March. Two forthcoming titles on environmental politics are [Oceans Rise, Empires Fall: Why Geopolitics Hastens Climate Catastrophe](#), due in February from Oxford University Press, and [Long Problems: Climate Change and the Challenge of Governing across Time](#), due in April from Princeton University Press. Lastly, Atlantic Books will release the paperback of [Masters of the Lost Land: The Untold Story of the Fight to Own the Amazon](#) in January.

Three natural history titles that came to our attention are the privately published [Antarctica: A Bird's-Eye View](#), which is in stock now; [Spectacular Britain: A Spotter's Guide to the UK's Most Amazing Natural Phenomena](#), due in January from Conway Maritime Press; and the paperback of [The Swimmer: The Wild Life of Roger Deakin](#), due in April from Penguin Books.

Finally, a miscellany of titles across the subject areas of respectively ecology, earth sciences, evolution, and environmental history. Princeton University Press has announced [The World Atlas of Rivers, Estuaries, and Deltas](#) for April, while the rest are paperback reissues: [Blue Machine: How the Ocean Shapes Our World](#), due in May from Penguin Books; [Imperfection: A Natural History](#), due in February from MIT Press; and [The Earth Transformed: An Untold History](#), due in April from Bloomsbury.

As always, if you are looking for a particular title that we do not yet have in our range, or you would like to suggest a title for NHBS to stock, please do get in touch.

Join Us on an Exhilarating Journey from the Origins of Life to the Present Day!

Sarah Darwin(Author), Eva Maria-Sadowski(Author), Olga Baumert(Illustrator)

The Earth has come a very long way from the molten planet with oceans of magma that existed 4.5 billion years ago. Since then, the land has shifted, the climate has changed and life has flourished. But how exactly did living things come to be?Let...

Nocturnalia

Nature after Dark in the Wild West

Charles Hood(Author), José Gabriel Martínez-Fonseca(Author)

Darkness is something humans strive to keep at bay, but under the glow of twilight a nocturnal universe stirs to life. Nightshade blossoms bloom, javelinas parade down city streets, fox eyes gleam under the cover of the forest, and tiny sparrows fly...

Water and Peace

A Journey through the World's Most Explosive Conflict Zones in Search of Deep Water

Alain Gachet(Author)

In countries where scarce surface water causes disease and conflict, an abundance of water can bring peace. With the growing impact of climate change, an estimated one third of the world's population lacks fresh water. By 2050 it could well be...
